I. SUMMARY

1) WHAT IS ODYSSEY(OCN) PROTOCOL?

Odyssey(OCN)'s mission is to build the next-generation decentralized sharing economy & Peer to Peer Ecosystem.

Odyssey(OCN) aims to reduce overall operating cost, increase marketplace efficiency and boost ROI of product & service providers in the Global sharing economy & peer to peer ecosystem.

Odyssey(OCN)'s official token is OCN. OCN is the basic unit of accounts in Odyssey(OCN)'s blockchain. The value of all other tokens is derived from the value of OCN. Those who wish to enter or exit Odyssey(OCN) must buy or sell OCN.

Using blockchain smart contract as well as AI and Big Data, Odyssey(OCN) will empower the ecosystem with below revolution:

One Credit/Trust-Based Protocol for all Odyssey(OCN) ecosystem players:

- Decentralized and Minimum Operating Cost
- Open Source and Scalable
- Trustworthy and Anonymous
- Autonomous and Better Compliance
- Incentivized Participation
- Monetization

Peer to Peer Ecosystem Community:

- Decentralized and Minimum Transaction Cost
- Easier Monetization
- Better Distribution and Matching
- Quicker Transactions without payment barriers

2) DETAILS

- General information

Cryptocurrency	OCN
First Issuance Date	January the 17th, 2018
Webpage	https://www.home.ocnex.net
Consensus Algorithm	Odyssey(OCN) at the moment is ERC 20

3) Exchange Markets Odyssey(OCN) has been listed on

Bittrex	CobinHood
Upbit	IDAX
Gate.io	Funcoin
Huobi Pro	HitBTC
Kucoin	Cointiger
Bit-Z	FCoin

II. ODYSSEY(OCN) PROTOCOL FOUNDATION

Odyssey(OCN) is a revolutionary mission against the current centralised sharing economy to build one decentralised sharing economy and peer to peer ecosystem. The sharing economy has been rapidly emerging as a large and expanding force. This is fueled by declining transaction costs. Smartphones, internet connectivity, and the cloud allow consumers to efficiently search for their desired goods and services, understand terms, ensure timely logistics, and enforce the agreed-upon contracts. Formerly frustrating transactions have become less troublesome.

In the future, sharing will become the norm and private ownership will be a luxury. One may own nothing but everyone can simply share everything. One can adjust your expenses flexibly in accordance with the demand. One will purchase something to the extent that one actually needs it instead of spending more. Sharing will enable utilisation of spare resources and increase the overall income and welfare of the society.

The Odyssey(OCN) protocol foundation limited is set up with the approval of the accounting and corporate regulatory authority (ACRA) and under supervision and regulation of the company law of Singapore. It is run by the board of trustees or the board of governors formed by eligible trustees for independent management and operation, which is also independent from the government's administration.

Singapore is renowned for its stable and well-established laws and financial environment. As a non-profit entity established in Singapore, the Odyssey(OCN) Protocol foundation limited, subject to the laws of Singapore, is a legal entity having no commercial interest that supports and engages in activities for public or private rewards. The rewards obtained by the foundation are deemed surplus and will be retained for the organization and implementation of other activities and events. Members of the foundation will never partake any distribution of rewards.

III. ODYSSEY(OCN) CONCEPTS AND HIGHLIGHTS

1) PRODUCT & INFRASTRUCTURE

ODYSSEY(OCN) TOKEN

OCN is the official Token of Odyssey(OCN) and the basic unit of accounts in Odyssey(OCN)'s blockchain. The value of all other tokens is derived from the value of OCN. Those who wish to enter or exit Odyssey(OCN) must buy or sell OCN. OCN can be used to purchase all services in the ecosystem. OCN is also the basic unit of Odyssey(OCN)'s incentive mechanism. All Dapps, Services Providers, Service Consumers, and other roles in the Odyssey(OCN) ecosystem will receive OCN as incentive based on Odyssey(OCN) protocol's incentive mechanism for their contribution to the entire ecosystem in different stages and from all perspectives.

ODYSSEY WALLET

Odyssey(OCN) intends to develop the ODYSSEY Wallet, which will handle all Odyssey(OCN)-related transaction activities such as creating the user's wallet on the Ethereum blockchain (or future Odyssey(OCN) public chain). The ODYSSEY Wallet-API will allow services and merchants to implement OCN as payment option.

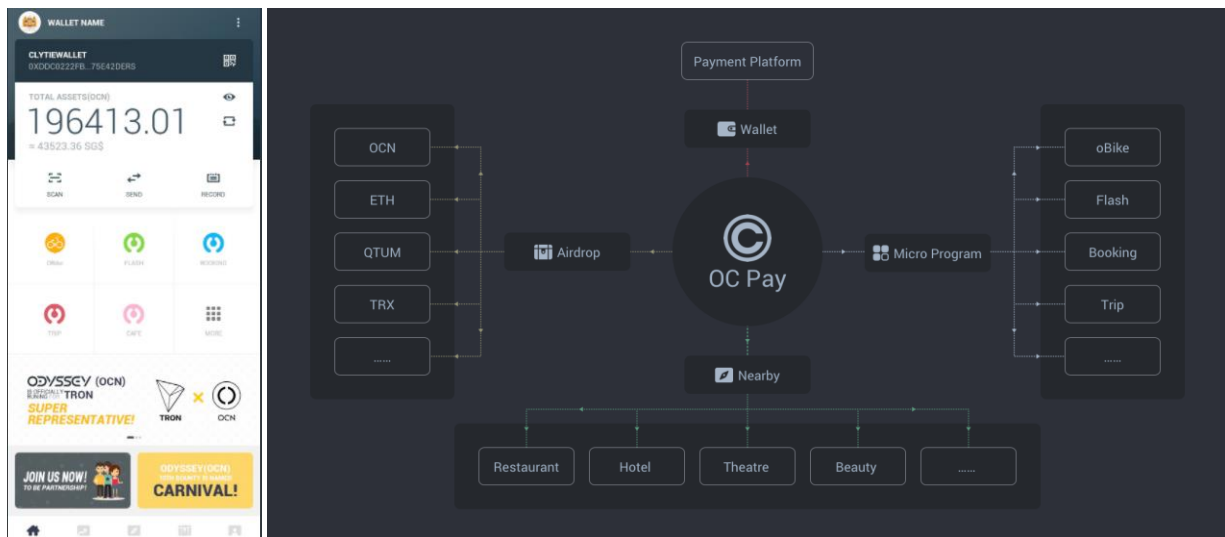

oBike is the first sharing economy platform to be compatible with Odyssey(OCN) protocol with the implementation of ODYSSEY Wallet on their platform, making OCN available for 10 million users across 17 countries.

OCPay

With the integration of ODYSSEY Wallet to different services, Odyssey(OCN) will also release OCPay, a global mobile payment App that connects all services integrated to ODYSSEY Wallet to one single User Interface. Customer will be able to handle everything related to OCN in the app. OCPay V1.0 was released in July.

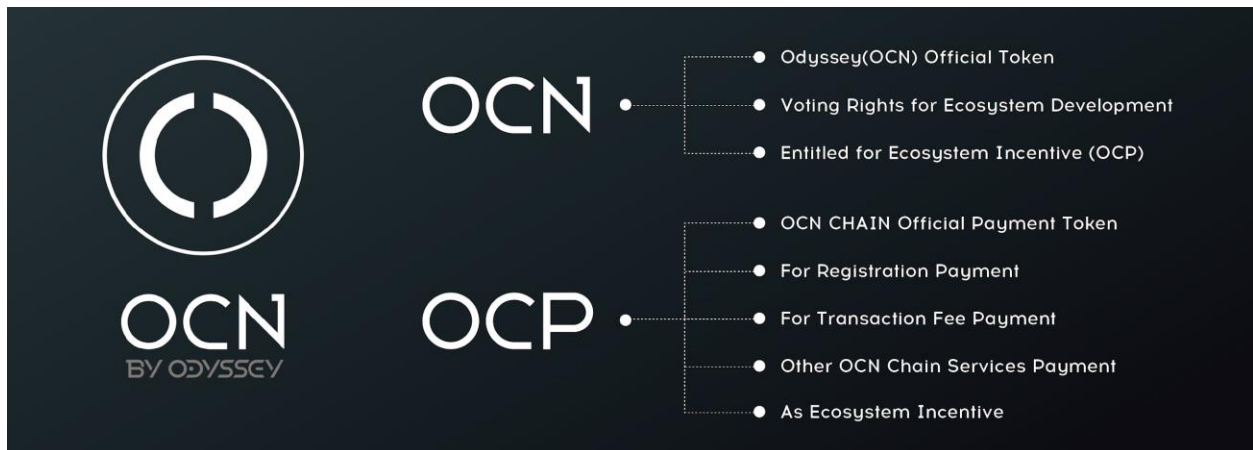

OCN Chain

Odyssey(OCN) has also began the development of its own blockchain, called OCN Chain. OCN Chain will allow the integration of OCPay with a multitude of other networks, services, and businesses globally. This is in direct comparison to Ethereum, which has become overloaded with the advance of DApps being built on the network, leading to higher transaction fees and slower blocktimes. OCN Chain will simplify the integration of other blockchain providers into OCPay and ODYSSEY Wallet, lower cryptocurrency transaction fees for businesses, consumers, and service providers within the Odyssey(OCN) ecosystem, and streamline the on-boarding of new providers throughout the entire Odyssey(OCN) ecosystem

OCP

Odyssey(OCN) is planning to introduce a new token called OCP, OCN Chain's official payment token. OCP will be used in Odyssey(OCN)'s ecosystem and OCN Chain to pay for OCN Chain services such as asset registration and transactions. OCN which remains as the official token of Odyssey(OCN) ecosystem, will entitle all token holders with voting rights such as super nodes election and other ecosystem development mechanisms design.

OCNex

OCNex is a critical development in the Odyssey project lifecycle, and we are excited to announce that we are proudly partnering with OKEx for its development. Odyssey will be able to leverage OKEx's leading technical and customer service infrastructure for OCNex's launch.

OkEx is a globally leading leading crypto exchange, founded in 2014, and boasts the #1 or #2 position for highest trading volume worldwide on a daily basis. OCNex will bring great liquidity and adoption to the OCN platform and its related tokens such as OCP. Odyssey will be one of the only projects, in the crypto economy, to bring about such mass adoption and circulation to our project. We look forward to announcing further details on OCNex soon.

ODYSSEY(OCN) SYSTEM INCENTIVE & CREDIT RATING STIMULATION PROTOCOL

Odyssey(OCN) smart contract is designed to include an effective economy stimulation mechanism to encourage everyone to contribute to the ecosystem. All incentives awarded will be directly related to the Credit of their recipient, in order to encourage and regulate all users to provide good quality services, provide objective reviews, to ultimately enable the ecosystem to be autonomous.

In the Odyssey(OCN) Ecosystem, all profit generated from each service rendered will go directly to the service providers. Additional system incentives will also be dynamically related to the service providers' real time Credit rating, as well as the entire ecosystem service provider density and transaction volume. There will be more incentives received as per better rating, more incentives received for services successfully rendered during periods of low supply and low transaction volume.

2) COMMUNITY HIGHLIGHTS

Total Impressions on Twitter	44.85 million
Twitter Followers	100,010
Twitter Mentions	132,332 times
Telegram Members	168,122
Telegram Daily Comments	1783

August:

- OCNex has officially signed with OKEx, a globally leading leading crypto exchange
- Odyssey has officially launched OCP airdrop snapshot activities on August 1st

July:

- OCPay V1.0 is launched to Android
- Odyssey(OCN) announces the official media partnership with BlockAsia
- Odyssey(OCN) release open letter explaining the future roadmap that soon will be updated
- Odyssey(OCN) officially announces it is listed on the trading platform Fcoin

June:

- Odyssey(OCN) officially announces the release of OCPay Beta with version V1.0 planned release in early July
- Odyssey(OCN) participates in Blockchain Open Forum 2018 in Seoul, Korea
- Odyssey(OCN) participates in the Livestream of TRON Independence Day and Mainnet Launch
- Odyssey(OCN) announces the development of OCN Exchange will be added into the Roadmap
- The OCPay Beta version is released for the community to try out
- Odyssey(OCN) has the first Meetup in Seoul, Korea together with BlockAsia
- CoinMarketCap updates OCN Circulated supply to closer reflect actual supply
- Odyssey(OCN) participates in Innovfest UnBound in Singapore
- OCN is integrated into BitPub which is released by Odyssey(OCN)'s strategic partner DotC United Group

May:

- Odyssey(OCN) announces the OCP Airdrop Programme that will distribute 10 000 000 000 OCP to our OCN token holders
- Odyssey(OCN) announces OCPay Mobile Payment app will be launched in early June for Android and End of June for iOS
- Livestream with the Tech Team discussing Odyssey(OCN)s roadmap
- Odyssey(OCN) participates in CONSENSUS by Coindesk in NYC
- Odyssey(OCN) initiate the new Partnership Program to find new companies and organizations for future collaborations
- Odyssey(OCN) have the first Community Engagement Contest

April:

- Odyssey(OCN) participated in WORLD BLOCKCHAIN CONFERENCE in Singapore
- Odyssey(OCN) participate to become one of TRON next Super Representative
- Odyssey(OCN)'s Marketing Manager, Summer Xu had Livestream with the Japanese crypto influencers @UHOUHODON & @HUNI_CRYPTO
- Odyssey(OCN)'s Community Manager, James Lawrence, Discussed about OCN on the Crypto Podcast "Coffee & Crypto".

March:

- Sophie Guan, Director, visits Huobi for a Live Stream discussing Odyssey(OCN)s coming development

February:

- Chief Advisors Yi Shi & Justin Sun talks about Odyssey(OCN) & TRON in Livestream

3) DETAILS of OCP AIRDROP

Total OCP Issue Amount is fixed as 10 Billion. Same as OCN. OCP will be distributed only as airdrops to OCN token holders. All OCP collected in future by the ecosystem as OCN Chain network usage fee will be re-distributed back to all OCN token holders as incentive.

TOTAL DISTRIBUTION

10 000 000 000 OCP

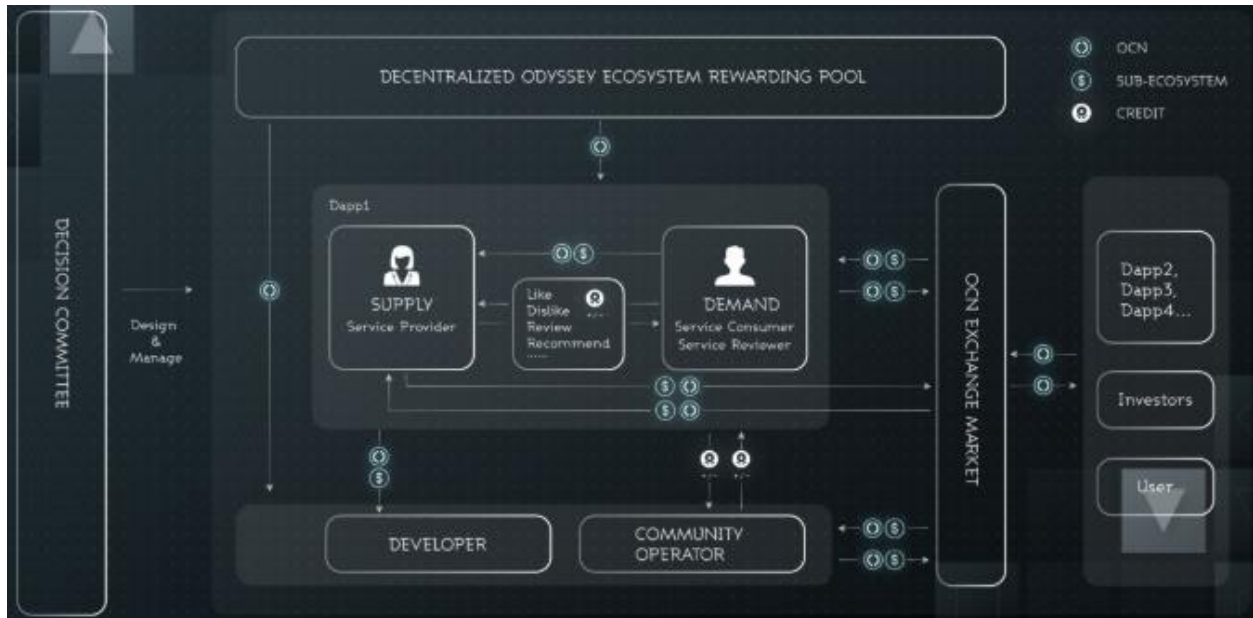

TOTAL DISTRIBUTION PERIODS:

50 (Months)

OCN AIRDROP FOR EACH PERIOD:

200 000 000 OCP

IV. TECHNICAL FEATURES

In Odyssey(OCN), we highly value every participant in the entire ecosystem, and intend to evaluate every individual's contribution to the ecosystem based on the incentive mechanism. Individuals, Groups, Dapps will all be able to contribute to the ecosystem.

- An autonomous, high efficiency, low cost, Credit-based, highly incentivised marketplace
- Dynamic Economic Stimulation Mechanism to incentivise every individual who participates in the sharing economy's ecosystem.
- Dynamic Economic Stimulation Mechanism to incentivise every DAPP (sub ecosystem) who contributes to the sharing economy's landscape.
- ONE high quality payment network to connect the entire sharing economy.
- ONE universal trustworthy Credit-based protocol and single UID to empower the entire sharing economy
- Open Source and embracing revolutionary ideals

V. ROAD MAP FOR 2018

PRE-LAUNCH:

- Odyssey(OCN) Token Sale Stage (2018:1)
- Odyssey(OCN) Token Sale began (2018.1.17)
- Token Sale ended. 10 billion OCN issued and 6 billion OCN in circulation (2018.1.26)

PHASE 1: MVP REALIZATION (2018.2 ~ 2018.10)

- ODYSSEY wallet
- Credit-based universal protocol for Odyssey(OCN) sharing economy ecosystem
- Rewarding mechanism for sharing economy participants
- OBIKE to be the 1st sharing economy platform to be compatible with Odyssey(OCN) protocol

PHASE 2 - ECOSYSTEM ESTABLISHMENT (2018.10 ~ 2019.10)

- Integrate subsequent batches of sharing economy and P2P system to Odyssey(OCN) ecosystem
- Odyssey(OCN) will adopt latest solution to address inherent limitations within Ethereum blockchain technology especially for high-frequency and small amount transactions.
- Odyssey(OCN) will also consider employ a strategy to deal with the scaling challenge. For example, by performing off-chain transactions in a safe and reliable manner, then record these transactions in the EVM at a later time. We will adopt that best solution as it becomes available.

PHASE 3 - ECOSYSTEM BOOMING (2019.10 ~ 2021.10)

- To build one data and transaction system to connect all sub-ecosystems, leveraging the universal credit-based Odyssey(OCN) protocol
- Utilizing data across all sub-ecosystems, leveraging AI and big data technology to increase overall market effectiveness, user acquisition ROI and ecosystem health growth.

VI. LATEST BUSINESS DEVELOPMENTS & PARTNERSHIPS

OBIKE

Odyssey(OCN) has successfully integrated ODYSSEY Wallet into oBike's platform. With the integration 10 million users over 17 countries can access OCN as acceptable payment option. Under the agreement with Odyssey(OCN), oBike will pilot the use of OCN, the digital asset of the Odyssey(OCN) Protocol, which features its first of a kind social credit and reward-based Protocol.

TRON

Odyssey(OCN) will run for TRONs Super Representatives. Super Representatives play a key role in governing the TRON community by ensuring basic functions, e.g. block generation and bookkeeping, and obtain corresponding earnings. Additionally, Odyssey(OCN) is testing and evaluating TRONs Mainnet as potential platform for building our infrastructure that will allow the next decentralized sharing economy.

Odyssey(OCN) are also running to become TRON Super Representative on TRONs upcoming Mainnet. Odyssey(OCN) has successfully deployed their Super Representative Testnode on TRONs Testnet including an interface for programmers to test and develop tron-related applications.

SEMI & SEMA

Odyssey(OCN) has a strategic partnership with Singapore Economics & Management Institute (SEMI) and Singapore Economics & Management Advisory (SEMA). Odyssey(OCN) will be part of SEMI's curriculum to educate about Blockchain tech. Odyssey(OCN) will build new partnerships in Singapore and around the world through SEMA.

DUCATUS

Ducatus is creating an ecosystem that links Ducatus to people and the various industries that serve their needs, from lifestyle, travel and hospitality, to health, charity and more. It is powered by a combination of world-class digital infrastructure, an extensive network

distribution system and a suite of related Crypto-Economy businesses, including Ducatus Cafes in Singapore and Bali, and a projected 100 more franchises worldwide in the next 3 years. Odyssey has partnered with Ducatus to allow users to transact using the Odyssey(OCN) token OCN at Ducatus platforms, the first of which is the acceptance of OCN at the Ducatus Café in Singapore.

SINGAPORE FINTECH ASSOCIATION

The SFA is a cross-industry not-for-profit initiative that provides stakeholders and market participants across the Fintech sector with a platform to facilitate a marketplace for collaboration and solution building in Singapore. Odyssey(OCN) will look to work closely together with the SFA and use it as a vehicle to be connected to like-minded blockchain players and enthusiasts to foster strategic partnerships and spread the idea behind Odyssey(OCN)'s protocol of building the next-generation decentralized sharing economy & Peer to Peer Ecosystem.

ACCESS

Odyssey(OCN) has officially become a Member of the Singapore Cryptocurrency and Blockchain Association ACCESS. ACCESS facilitates the exchange of ideas, knowledge and resources in the cryptocurrency field. By partnering with a wide range of organisations, the association also aims to promote the use and development of its Members' digital currencies and Blockchain across multiple industries. Odyssey(OCN) believes that a united public voice and platform for the Singaporean cryptocurrency and blockchain community will allow all players to have stronger engagement with the private sector and government.

AWS

Odyssey(OCN) announced that it has officially partnered with AWS Technology. With access to AWS cloud services in Southeast Asia, Odyssey(OCN) will enable a new form of global sharing economy to fly. In the future, through access to AWS services in Southeast Asia, Odyssey(OCN) will depend on the AWS cloud service advantages, continue to shared economic blockchain technology, effectively reduce transaction costs of industry participants in sharing economic operation, build reputation/credit based business system.

BitPub

Odyssey(OCN) is happy to introduce BitPub, a new one-stop Blockchain Service Platform App developed by our strategic partner DotC United Group, which integrate market data, chat community, and assets management.

With the aim to gather the most essential insights and tools right in the pocket of crypto enthusiasts alike, BitPub combines all the key features of MEW(with ERC20 and BTC support), CMC and Telegram.

BlockAsia

Odyssey(OCN) has announced official media partnership with BlockAsia. BlockAsia is Southeast Asia's largest blockchain and cryptocurrency news media platform for all information, revelation and sources regarding the latest Blockchain, ICOs and Cryptocurrency projects. With this collaboration, Odyssey(OCN) aims to gain exposure within the Southeast Asian and Korean market by tapping into Block Asia's media resources. Through this move, Odyssey(OCN) also hopes to be able to expand its Southeast Asian reach, all the while cultivating and engaging a brand-new community.

VIII. CONCLUSION

Odyssey(OCN) Protocol aims to revolutionize the decentralized sharing economy with the goal to change people's and industries' perception of ownership where participation and contribution to the ecosystem will get incentivized. We have attracted global attention from partnerships with reputable organizations and institutions such as TRON, oBike, SEMI and SEMA and more collaborations are in progress. Moreover, 2018 road map continues to proceed on schedule with the first integration of ODYSSEY Wallet into oBike's platform. The development of OCPay is positively progressing forward and the development of Odyssey(OCN) testnet is continuing. Odyssey(OCN) Protocol's growth is driven by the recognition of its excellent development team and advisors, continued contracts of work with diverse companies and institutions, and robust research and development program. We expect Odyssey(OCN) and OCN will have a positive impact on growing and advancing the Korean cryptocurrency ecosystem.
